Bridgestone – Safe driving solution

With particular characteristics such as long-distance mobility, heavy load and different road conditions, truck/bus drivers have to face a lot of dangers. Besides infrastructure and drivers' consciousness, the lack of vehicle care attention, particularly in tire care, is one of the main causes of accidents.

To ensure the safety for long-distance journeys, both drivers and vehicle's owners need to focus more on choosing high prestige and quality tires with significant durability as Bridgestone tire. It is considered an appropriate solution for "safety on road" as well as economic issue in long-term investment.
